DISTRIBUTION NOTICE

Aberdeen Income Credit Strategies Fund (NYSE: ACP) (the “Fund”), a closed-end fund, today announced that it paid on October 29, 2019, a distribution of US\$0.12 per share to all shareholders of record as of October 21, 2019 (ex-dividend date October 18, 2019). Please note that this distribution is not payable with respect to the shares that will be issued pursuant to the rights offering that was announced by the Fund on October 2, 2019 and that is due to expire on November 13, 2019.

The Fund’s distribution policy is set to provide investors with a stable monthly distribution out of current income and, to the extent necessary, paid-in capital. Return of paid-in capital includes distributions paid by the Fund in excess of its net investment income and net realized capital gains and such excess is distributed from the Fund's assets. A return of capital is not taxable; rather, it reduces a shareholder's tax basis in his or her shares of the Fund. The Fund is required to distribute realized net capital gains, if any, on an annual basis, which may be deemed part of a distribution where possible.

Under U.S. tax rules applicable to the Fund, the amount and character of distributable income for each fiscal year can be finally determined only as of the end of the Fund’s fiscal year. However, under Section 19 of the Investment Company Act of 1940, as amended (the “1940 Act”) and related Rules, the Fund may be required to indicate to shareholders the estimated source of certain distributions to shareholders.

The following table sets forth the estimated amounts of the sources of the distribution for purposes of Section 19 of the 1940 Act and the Rules adopted thereunder. The table has been computed based on generally accepted accounting principles. The table includes estimated amounts and percentages for this distribution and for the cumulative distributions paid relating to fiscal year to date (11/01/2018 - 09/30/2019), from the following sources: net investment income; net realized short-term capital gains; net realized long-term capital gains; and return of capital. The estimated composition of the distributions may vary from month to month because the estimated composition may be impacted by future income, expenses and realized gains and losses on securities and currencies.

As of October 9, 2019 after giving effect to this payment, the Fund estimates it has a net deficit of \$62,151,000. A net deficit results when the Fund has net unrealized losses that are in excess of any net realized gains that have not yet been distributed.

Shareholders should not draw any conclusions about the Fund's investment performance from the amount of the Fund's current distribution.

The amounts and sources of distributions reported are only estimates and are not being provided for tax reporting purposes. The final determination of the source of all distributions in 2019 will be made after year-end. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of the fiscal year and may be subject to change based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.
